

WI-FI CONFIGURATION INSTRUCTIONS FOR XK-06 AND XK-10 WIRED CONTROLLERS

1. Wi-Fi Connection Instructions.

1. Introduction:

Scan the QR code below with your mobile device to download the app, or search for “AC Freedom” in the App Store or Google Play Store.

Android

iOS

2. Built-in Wi-Fi:

The two wired controllers (XK-06 and XK-10) are equipped with built-in Wi-Fi modules. The installer does not need to connect any additional Wi-Fi modules to the PCB of the indoor unit, which makes installation easier and faster.

XK-06

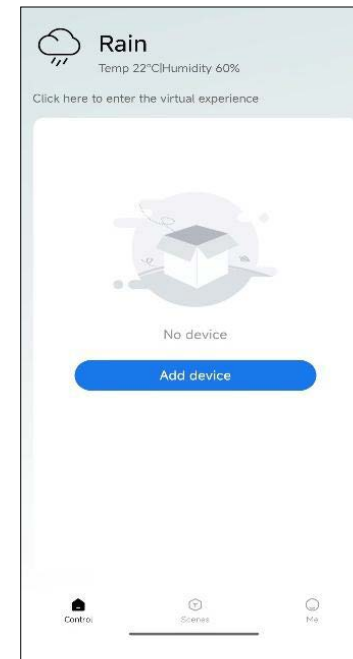

XK-10

3. Device Configuration:

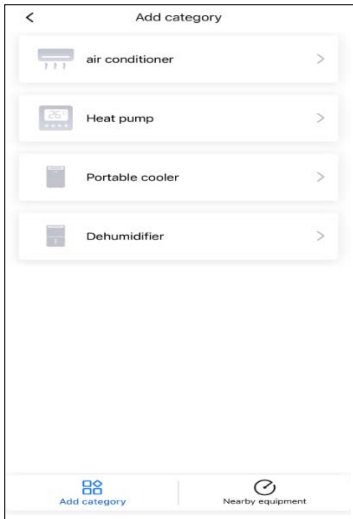

3.1. Place the device next to the Wi-Fi router. Connect your smartphone to the Wi-Fi network.

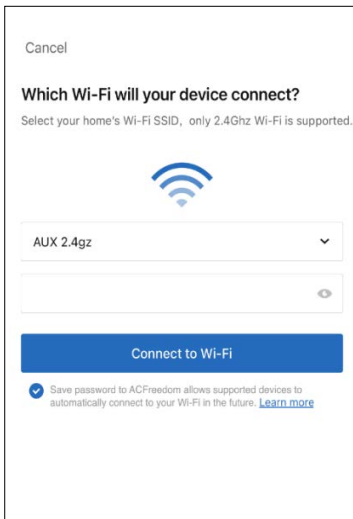

Note: This device works only with a 2.4 GHz router.

3.2. Open the “AC Freedom” app. As shown in the illustration, tap “Add Device.”

3.3. Select the type of device to be connected.

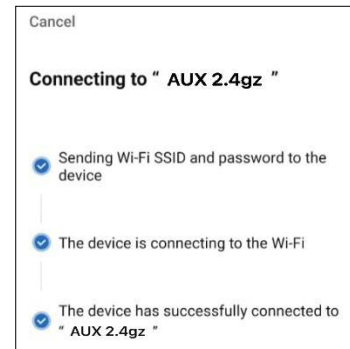

3.4. Enter the Wi-Fi network password and tap "Connect to Wi-Fi."

3.5. Press and hold the "FUNCTION" and "SPEED" buttons simultaneously for 5 seconds to reset Wi-Fi.

3.6. As shown in the illustration, wait for the process to finish. This indicates that the device has been connected successfully.

3.7. Configuration completed successfully. Tap "Join Room" — you can now use the app to control the air conditioner.
